

F2 Partition authority and the one-way spend of evidence

Every access below was taken once. None can be taken again.

TRAIN — 56 subjects · 44 evaluable · 132 streams

the only partition a future experiment may use

E11 prospective 3-fold subject-disjoint split · folds 19 / 19 / 18

digest ce037309cc...206c3

held-out geometry population — 44 subjects / 79 streams

CONSUMED 2026-08-28 (E13a) for confirmatory geometry

VALIDATION — 12 subjects · 9 with positives

SPENT for confirmatory purposes — used for hypothesis generation across E1-E10; may not serve as fresh confirmation.

TEST (sealed) — CONSUMED 2026-08-25, attempt 1 of 1

repeat_attempt_permitted: false · four sealed artifacts immutable · the fifteenth and last budget

All fifteen one-shot budgets are spent.

A spent AUTHORIZED flag is a receipt for an access already taken, not a live permission. Every future run needs a fresh human authorization.

one-way
